Accept Bitcoin Payments

A simple guide to Lightning Network payments for your business

⚡ Instant Settlement   No Chargebacks

## How Your Customers Pay
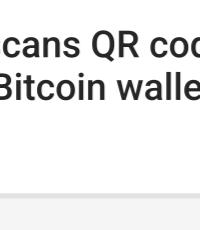

1 Customer scans QR code with their Bitcoin wallet

→
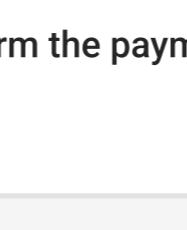

2 They confirm the payment amount

→
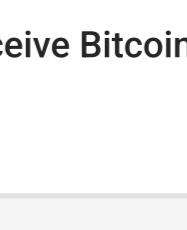

3 You receive Bitcoin instantly

Why Merchants Choose Lightning

Instant Settlement
Payments settle in under 10 second. No waiting days for funds to clear.
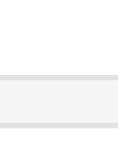

Zero Fees
Receiving a payment costs you nothing.
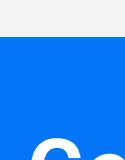

No Chargebacks
Bitcoin payments are final. Eliminates fraud risk.
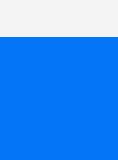

Global Payments
Accept payments from customers worldwide. No borders.

Getting Started is Easy

1 **Download Blitz Wallet**

2 **Create your Lightning address** (e.g., blake@blitzwalletapp.com)

3 **Display your QR code** at checkout or in your store

4 **Start accepting payments** immediately

Your Payment Setup

Each Blitz user can create their own Lightning address. Just got to Settings > Edit Profile and then change your username. Customers can then send to your Lightning address directly. (E.g username@blitzwalletapp.com)

- Works with any Lightning wallet
- No special hardware required
- Print or display digitally

Common Questions

Do customers need special equipment?
No. Customers just need a Lightning-compatible Bitcoin wallet app on their phone. Many popular wallets support Lightning payments.

Do I need to hold Bitcoin once I receive payments?
Blitz Wallet allows you to convert between USD and Bitcoin directly inside the wallet. You can choose how much Bitcoin you want to hold.

Is it secure?
Yes. Lightning payments use Bitcoin's proven cryptography. Payments are final and cannot be reversed, protecting merchants from fraud.
